Product Safety Testing

Purpose: The purpose of the following cytotoxicity test is to ensure that the **AIRCONcare™** formerly known as **CONCAIRE™** aircon washing product is safe for human household use.

Test Condition: The test concentration is based on the human exposure left in the airconditioning unit after washing.

Product Application: At each application,

- **Spray:-** 400ml of the solution is diluted with 400ml of water. Of this 800ml, only 20ml remains clinging to the various parts of the airconditioning unit.
- **Rinse:-** At least another 800ml of water is used to flush the unit causing the resultant residue left on the aircon at 0.1% effective concentration.

Test Lab: PSB Corp Ref: 57S062446-02-SLE

Results: The Concaire™ Solution is **noncytotoxic** to living tissue at the product recommended concentrations based on the PSB Test Report.
